# Storybook Albums

Our Storybook albums are the ultimate in contemporary wedding albums.

It is almost impossible to describe in words the unique presentation and visual impact of these albums - they must be seen.

From breathtaking panoramas to individual pages with multiple image sequences, soft blended backgrounds and pastel fades, these albums have re-defined how wedding photography can look

All our albums are hand made using premium materials, and this together with a selection of innovative and eye catching designs, gives all of our albums a complete 'wow' appeal.

Some album covers have a distinctly romantic feel, while others offer a more clean and contemporary look plus if you are looking for your album to be even more exclusive we can even offer albums bound in organic Swedish leather or decorated with genuine Swarovski crystals !

In addition to the album cover, there are also other ways in which you can personalise your album design.

Your album can be designed in either a vertical ( portrait ) format, or a horizontal ( landscape ) format, and the pages inside the album can have either a lustre or high gloss finish.

Individual page designs can also be coordinated to compliment the cover, again with either a contemporary emphasis or with the softer more romantic feel.

# Storybook Albums

Coverage for all Storybook Collections include two photographers at your wedding ensuring that all the significant events of your wedding are covered with both formal and candid style photography.

The coverage would normally start with the bridal preparations at the brides home or venue, carrying on through the ceremony and then moving onto the reception where the groups and formal shots are normally taken. We would then photograph Bride and Groom with the cake and continue the coverage right up until the first dance.

Your album can contain any mixture of colour or black and white photos, and we will also include some part colour / part black and white photographs if required.

All Storybook albums, regardless of page size, can contain up to 80 pages of photographs ( 40 leaves )
